

**Work Notice**  
**Schlage Operable Unit (OU) and UPC OU**  
**2401 and 2555 Bayshore Boulevard**  
**San Francisco, CA**

**Field Work Beginning January 14, 2010**

**Purpose of this Work Notice:**

The Department of Toxic Substances Control (DTSC) is distributing this notice to inform the community about upcoming work at the Schlage OU and UPC OU (Site) located at 2401 and 2555 Bayshore Boulevard, San Francisco, CA. Previous investigations have determined the presence of metals in soil, and volatile organic compounds (VOCs) in soil and groundwater beneath the site as a result of past manufacturing activities.

**What work will be done?**

DTSC approved a Remedial Action Plan (RAP) on November 16, 2009 to clean up the soil and groundwater at the site. Work will be conducted to clean up the contamination in the groundwater. This work will consist of injecting edible vegetable oil (EVO) with sodium lactate. This food grade substance will cause the VOCs in groundwater to break down into a non-harmful substance. The injections will begin on **January 14, 2010**, and will be completed in about a month. All work will be conducted between the hours of 7:00 am and 6:00 pm, Monday through Friday. Work activities will include the following:

- Injections of EVO into groundwater. About 10 to 20 injections will be done per day; a total of about 310 injections will be completed within a one month period.
- The EVO will be injected using direct-push borings. This method doesn't create dust and won't disturb possibly contaminated soil because the steel injection rods are pushed into the ground.
- Workers will be wearing safety gear while working on-site and operating heavy equipment.

There should be no significant disruption of traffic, dust, or other nuisances associated with this work. Clean up of contaminated soil will begin at a later date. You will be notified before that work begins.

**How can I find out more?**

This notice is being sent to the community for informational purposes. This document and a complete record of the site can be found at:

SF Public Library  
Visitacion Valley Branch  
45 Leland Avenue  
San Francisco, CA
