

Work Notice

**Schlage Operable Unit (OU) and UPC OU
2401 and 2555 Bayshore Boulevard
San Francisco, CA**

Field Work Beginning June 20, 2011

Purpose of this Work Notice:

The Department of Toxic Substances Control (DTSC) is distributing this notice to inform the community about upcoming work at the Schlage OU and UPC OU (Site) located at 2401 and 2555 Bayshore Boulevard, San Francisco, CA. Previous investigations have determined the presence of metals in soil, and volatile organic compounds (VOCs) in soil and groundwater beneath the Site as a result of past manufacturing activities.

What work will be done?

DTSC approved a Remedial Action Plan (RAP) on November 16, 2009 to clean up the soil and groundwater at the Site. Work to clean up the contamination in the groundwater began in January 2010 when emulsified vegetable oil (EVO) with sodium lactate was injected into the groundwater. This food grade substance causes the VOCs in groundwater to break down into a non-harmful substance. A second round of injections was completed in August 2010. The first round of injections in San Mateo County was completed in December 2010. This third round of EVO injections in San Francisco County will include additional injections of zero valent iron (ZVI). The ZVI injections will improve conditions for the EVO to break down the toxics in the groundwater. The injections will begin on **June 20, 2011**. All work will be conducted between the hours of 7:00 am and 6:00 pm, Monday through Friday. Work activities will include the following:

- Injection of EVO into groundwater. About 10 to 20 injections will be done per day; a total of about 130 injections within a 4 week period
- Injection of ZVI into groundwater. About 10 to 20 injections will be done per day; a total of about 50 injections within a 4 week period
- The EVO and ZVI will be injected using direct-push borings. This method doesn't create dust and won't disturb soil because the steel injection rods are pushed into the ground.
- Workers will be wearing safety gear while working on-site and operating heavy equipment.

There should be no significant disruption of traffic, dust, or other nuisances associated with this work.

How can I find out more?

This notice is being sent to the community for informational purposes. This document and a complete record of the Site can be found at:

SF Public Library
Visitacion Valley Branch
45 Leland Avenue
San Francisco, CA
(415) 337-4790

Visitacion Valley Community Ctr.
50 Raymond Avenue
San Francisco, CA
(415) 467-6400

Brisbane Public Library
250 Visitacion Avenue
Brisbane, CA
(415) 460-2060

For more information about this Site go to our website at www.dtsc.ca.gov and click on "Envirostor" at the top right hand column of the page. Then type in "San Francisco" in the City field and click on "Get Report." Then go to Schlage Lock on the 2nd page (the list is in alphabetical order) and click on "Report". If you would like DTSC to notify you via email when new EnviroStor documents (i.e., workplans, reports, etc.) are available online for this Site, please sign up to receive email alerts on the EnviroStor report page.

The full administrative record for the Schlage Lock site is available at the DTSC file room, 700 Heinz Avenue in Berkeley. Please call (510) 540-3800 to make an appointment to use the file room.

If you have any questions about this work, please contact DTSC's Project Manager, Chip Gribble, (510) 540-3773 or by e-mail at cgribble@dtsc.ca.gov. You may also call or e-mail DTSC's Public Participation Specialist, Wayne Hagen at (510) 540-3911 or whagen@dtsc.ca.gov. For media inquiries, please contact DTSC Public Information Officer Charlotte Fadipe at (916) 956-2838 or cfadipe@dtsc.ca.gov. For more information about DTSC and this project please visit our website at: www.dtsc.ca.gov.

Si prefiere hablar con alguien en español acerca de esta información, favor de llamar a Jacinto Soto, Departamento de Control de Substancias Tóxicas. El número de teléfono es (510) 540-3842.

如閣下對此清理計劃有疑問，請致電DTSC 職員 Henry Wong 黃先生，(510) 540-3770.

Injection Points for Schlage OU Groundwater Cleanup

All documents made available to the public by DTSC can be provided in an alternative format (i.e. Braille, large print, etc.) or in another language as appropriate, in accordance with State and Federal law. Please contact Wayne Hagen as noted above for assistance.
